FRONTLINE BUSINESS SOLUTIONS

Content Calendar System

Quick User Guide · November 2026

The Content Calendar System replaces our Excel social media calendar. Every post for every client is planned, reviewed, approved and tracked in one place, and clients approve their posts in the system instead of through spreadsheet comments.

Website	https://fbs-content-calendar.vercel.app
Who uses it	FBS team (admin accounts) and our clients (client accounts)
Need an account or a new password?	Ask an FBS admin. There is no “forgot password” email.

1. Getting started

Signing in

1. Open **https://fbs-content-calendar.vercel.app** in Chrome, Edge, Firefox or Safari.
2. Type your **Email** and **Password**, then click **Sign in**.
3. FBS team members open their last calendar (first time: Frontline Business Solutions). Clients open their own **Dashboard**.

> **Note:** The server sleeps when nobody uses it. The **first sign-in of the day can take up to a minute**. Wait, and click Sign in only once. If it times out, click it again.

Your password and signing out

- **Change your password** after your first sign-in: click your **name** at the bottom of the left menu → **Change password** (at least 8 characters).
- You stay signed in for **7 days** on that browser. Click **Sign out** at the bottom of the menu, especially on shared computers.
- On a phone, tap the **menu icon** (three lines) at the top-left to open the menu.

Two kinds of accounts

Task	FBS team (Admin)	Client
See clients	All clients	Own company only
Create posts	Yes	Yes, as requests to FBS
Edit, move, delete posts	Yes	Only their own requests, until FBS starts on them
Send for approval, Board, Generate month	Yes	No
Approve, request changes, reject, comment	Yes	Yes (own company)
Share ideas, export CSV, see Results	Yes	Yes
Manage clients, pillars, users, import	Yes	No

2. Finding your way around

The left menu

Item	What it does
Dashboard	Summary of all clients: which ones need you today.

Item	What it does
Approvals	All review work in one place. The number shows posts waiting and new client requests.
Content calendar box	The client you are working in. Click it (or press **Ctrl + K**) to switch client.
Calendar … Results	The pages of the chosen client (section 4). A yellow number on **Idea bank** means ideas are waiting.
Clients	Clients you pinned with the ☆ star, plus **All clients**.
Manage	Clients, Pillars & themes, Users, Import CSV (admins).

The top bar and page header

- **Back arrow** returns to the previous page; the **four-squares icon** jumps to the Dashboard.
- **Bell** shows what needs you: posts waiting for your approval, new client requests and ideas flagged for attention. There are **no emails**, so check the bell when you start work.
- **Month switcher** in the centre: ‹ Month Year ›, plus a calendar icon that jumps to today.
- **Generate month** (admins) and **New post** sit at the top-right of the **Calendar** and **Content plan**.
- **Search and Filters** (status, pillar, platform, approver, posts/ads) apply to every view. If a view looks empty, click **Clear**.
- You can copy the web address and send it to a teammate; they will see the same client, month and view.

3. Dashboard and Approvals (FBS team)

Dashboard

- Four tiles: **Posts this month**, **Waiting for approval**, **Needs edits** and **Next 7 days**. Click a tile to see those posts.
- **Needs attention** lists the clients that need action and why (for example “2 overdue” or “Nothing planned for the next 7 days”).
- **All clients** table: each client is marked **Behind** (red), **Needs attention** (amber) or **On track** (green).

Approvals page

Tab	Shows
My approvals	Posts “For approval” where **you** are the approver. Start your day here.
Waiting for approval	Every post waiting for approval, all clients.
Needs edits	Posts marked “To edit” or “Rejected”.
Next 7 days	Everything going out this coming week.
From clients	Posts a client asked for that FBS has not picked up yet.

4. The calendar pages

The same posts can be seen in different ways. A change in one view shows in all of them.

View	Use it to…	Main actions
Calendar	See the month like the old calendar tab.	Click a post to open it. Click **+** on a day (or double-click the day) to add a post. Admins drag a post to another day to reschedule.
Content plan	Read and edit many posts in rows, like Excel.	Edit cells, select rows to archive or delete, resize columns and rows, export CSV (section 6).
Daily view	Review one day with real post previews.	Pick a day in the week strip. **Approve**, **Request changes** or **Send for approval** right on the card.
Board (admins)	See which stage each post is in.	Drag a card to another column: In Progress, For Approval, Approved, Needs Edit, Scheduled, Published.
Idea bank	Collect content ideas without a date.	Share an idea. Admins click **Start creating** or **Mark as seen**, or open it and give it a date.
Results	See reach, engagement and top posts for the month.	Use the arrows to change month.

Reading a post on the calendar

- The **colour** of the box is the pillar (topic group); see the **Key** above the calendar.
- The small **dot** is the status, for example amber = waiting for approval, green = published.
- Small labels show the platforms: **FB** Facebook, **IG** Instagram, **in** LinkedIn, **TT** TikTok, **YT/YTS** YouTube, **ST** Story. The Content plan shows full names.
- **AD** in purple means a paid ad. A speech bubble shows the number of comments. Philippine holidays are labelled on their day.

5. Working with posts

Creating a post

1. Open the client's **Calendar** or **Content plan** and click **New post** (clients: **Add post**).
2. Type the **Topic / title** (the only required field) and choose the **Date**. With no date, it becomes an idea in the Idea bank.
3. Choose the **Pillar**, **Platforms**, **Approver** and the other details you know.
4. Click **Create post**.

The post window

Clicking any post opens a panel on the right with these tabs:

Tab	What goes there
Details	Title, date, time, pillar, status, platforms, approver, assigned to, format, type (Organic or Ad) and remarks.
Content	Story board, graphics idea, title draft, caption, hashtags, **pubmat links** (one per line) and reference link.
Ad setup	Only for ads: primary text, headline, call to action, description, targeting ad sets and the Botcake message.
Results	After posting: reacts, comments, shares, reach, engagement, link clicks and a feedback rating.
Discussion	Comments, plus an automatic **History** of every change and who made it.

> **Important:** Changes in the post window are saved only when you click **Save changes** (or press **Ctrl + S**).

- **Reschedule:** drag the post on the Calendar, change the Date cell in the Content plan, or change the Date in the post window.
- **Duplicate** (copy icon) or **Delete** (red bin icon) are at the bottom of the post window (admins).

6. Statuses and approval

The normal path of a post

Idea → In progress → Created → For approval → Approved → Scheduled → Published

Status	Meaning
Idea	A topic with no date yet, waiting in the Idea bank.
In progress / Created / Edited	Being made / ready but not checked / revised after feedback.
For approval	Waiting for the approver. Set automatically by **Send for approval**.
To edit / Rejected	The approver asked for changes / does not want the post. Read the Discussion tab.
Approved	The approver said yes. Ready to schedule.
Scheduled	Set to publish in Meta Business Suite or another scheduler.
Published / Boosted	Live / live with paid boost. Fill in the Results tab later.
On hold / Reschedule	Paused / needs a new date.

If you make the post (FBS team)

1. Finish the post (caption, hashtags, pubmat link), choose the **Approver** and click **Save changes**.
2. Click **Send for approval**. The post appears in the approver's bell and **My approvals**.
3. If it comes back as **To edit** or **Rejected**, read the **Discussion** tab, fix it, save and send it again.

If you approve posts (FBS team or client)

1. Find posts in the **bell**, the **Approvals** page or the **Daily view**.
2. Open the post, read the caption and click the **Pubmat** link to see the graphic or video.
3. Click **Approve**, **Request changes** or **Reject**. Request changes and Reject need a short comment so the team knows what to fix.

> **Tip:** For urgent posts, also tell the approver in your usual chat. The system has no email alerts yet.

7. Content plan tools

Editing (admins)

- Click a cell, type or choose from the list, then press **Enter** or click outside to save. **Shift + Enter** adds a new line; **Esc** cancels.
- The message at the top-right of the table shows "Saving…", then "All changes saved".
- Tick **Caption columns** or **Results columns** to show more columns. Click a column title to sort.

Archive or delete many posts (admins)

1. Tick the rows you want, or the box in the header to select every row shown.
2. In the bar that appears, click the **Archive** icon (box) or the red **Delete** icon (bin), then confirm.
3. To bring archived posts back: tick **Show archived**, select them and click **Restore**.

> **Tip:** When unsure, **archive** instead of delete. Archived posts can be restored; deleted posts are gone for good.

Resize columns and rows

- Drag the thin line on the **right edge of a column title** to make it wider or narrower.
- Drag the **bottom edge of a row** to make it taller (it shows more caption lines). Double-click an edge to reset it.
- Sizes are remembered on your own computer only. **Reset sizes** puts everything back.

Export to Excel

Choose the month and filters, then click **Export CSV**. Open the file in Excel or Google Sheets, for monthly reports or as a backup.

8. Setting things up (admins)

Pillars, weekday slots and Generate month

- **Manage → Pillars & themes**, then choose the client. Each pillar has a **colour**, a **name** and an optional **weekday slot** (for example Motivational Monday on Monday). Click the disk icon to save a row.
- On the Calendar or Content plan, **Generate month** creates an empty post for each weekday pillar on every matching day. Days that already have that pillar are skipped, so it is safe to click again.
- **Monthly themes** (same page): type the theme and weekly focus for each month, then save.

Clients

1. **Manage → Clients → Add client**. Type the name and pick the **brand colour**. Keep “Start with default pillars” ticked.
2. Click **Save**. Then set the client’s pillars and create a client login if they will review posts.
3. Use the **archive** icon to hide a client you no longer serve. Nothing is deleted.

Users

1. **Manage → Users → Add user**. Type the full name, email and a starting password (at least 8 characters).
2. Choose the role: **Admin (FBS team)**, or **Client (view & approve)** with their company.
3. Click **Save** and send the details privately. Ask the person to change their password after signing in.

- **Reset a password:** click the pencil icon, type a **New password** and save.
- **Disable an account:** click the person-with-X icon. Their comments and history stay.
- Posts imported from the old workbook with approvers “Sir Carlo”, “Ms. Ayeca” or “Sir Jhonny” **link automatically** when a user with that first name is created.

Import many posts from a CSV file

The **first row** of the file must have these headings (any order): **Date, Time, Pillar / Service, Topic, Type, Platforms, Status, Approver, Format, Story board, Caption, Hashtags, Pubmat links, Remarks**.

- All headings must be there, even if the column is empty. Only **Topic** must be filled in on every row.
- Rows with a **Date** go on the Calendar and Content plan; rows without a date go to the Idea bank.
- Save the sheet as **CSV**, open **Manage → Import CSV**, choose the client and the file, click **Preview**, check the rows, then click **Import**. Click **Template** for an empty file with the headings.
- Importing the same file again does not create doubles.

9. Guide for clients

Share this page with client users.

- Open **https://fbs-content-calendar.vercel.app**, sign in with the email and password FBS sent you, and **change your password** (click your name at the bottom-left).
- The system shows **your company colour**. You only see your own company's posts.
- **To review posts:** click **Approvals** (the number shows how many wait for you) → **Review**. Read the caption, open the **Pubmat**, then click **Approve**, **Request changes** (with a comment) or **Reject**.
- **To ask for a post:** click **Add post**, or the **+** on a calendar day. Write the topic, the date and what you want.
- **To share an idea without a date:** open **Idea bank**, fill in the idea and description, keep **Notify the team** ticked and click **Add idea**.
- **To talk to the team:** open a post → **Discussion** tab → type your message → send.
- **Results** shows your reach, engagement and best posts each month.

10. Quick help

Problem	What to do
Sign-in is slow or says "Cannot reach the server"	The server is waking up. Wait up to a minute and try again once. If it continues, tell the system admin.
"Incorrect email or password"	Check typing and Caps Lock. Ask an FBS admin to reset your password.
A view looks empty	A filter may be on. Click **Clear**. Also check the month.
My change disappeared	In the post window, click **Save changes** before closing.
I can't drag or edit a post (client)	Clients can only edit their own requests before FBS starts on them. Comment instead.
I deleted something by mistake	Deleted posts cannot be restored. Next time use **Archive**.
Columns in the Content plan are too narrow or wide	Drag the column edge, or click **Reset sizes**.

> **Note:** For the full details of every feature, see the complete **User Guide** (54 pages) in the project's docs folder.
